

Dear Hiring Manager,

I am excited to apply for the Web Engineer position at Science. With a background in full-stack development and experience building high-performance applications, I am confident my skills align well with the job requirements.

During my internship at Syracuse University, I developed a full-stack application using ReactJS, Flask, and Python, optimized with Aiven-hosted PostgreSQL and Redis. I also leveraged AWS Lambda and S3 in my ColorJam and TopicModelingForTweets projects, demonstrating my proficiency in serverless architectures and scalable data management.

At Vistaar Technologies, I improved system efficiency and customer satisfaction by resolving complex issues within a microservices architecture. My experience with React, TypeScript, PostgreSQL, and CI/CD pipelines ensures I can quickly adapt to your tech stack and deployment processes.

I am eager to contribute to Science's innovative work and would love the opportunity to discuss how my skills can support your team. Thank you for your time and consideration.

Sincerely,
Mohit Kambli
